

Cybersecurity Task Force

Our interdisciplinary and field-tested Cybersecurity Task Force helps you deal with cyber risks such as ransomware, infiltration and other cyber attacks. Together with our network of experienced partners, we offer you a cybersecurity check-up and advise you on the right way to handle an attack in an emergency.

Cybersecurity check-up

Together with our network partners or your external experts, we help you to be prepared for cyber attacks. The aim is to ensure that the management has made adequate provision for risk. You can choose modularly from different components:

Training / Workshops

Check IT security against
EU guidelines

Information lifecycle
management

Review of backups /
Disaster recovery plan

Examination of data
protection management

Examination of insurance
cover

We work with you to develop a **Cybersecurity Incident Response Plan** incl. documentation of measures, definition of responsibilities and contact persons for emergency contacts, establishment of alternative communication options and determination of external experts.

Support in case of emergency

Should you be affected by a cyberattack, we will be at your side immediately via an emergency contact coordinated with you and our interdisciplinary experts will advise you on legal issues in cooperation with other experts.

We advise and support on:

- Data protection notification obligations / BSI (German Federal Office for Information Security)
- Notifying and claiming your cyber risk insurance
- Negotiations with hackers, examination of your own criminal risks (money laundering, support of criminal organisations)
- Coordination of investigative authorities regarding required notifications
- Civil law / litigation to defend against claims of third parties (non-delivery, breaches of confidentiality, infection of third parties with malware)

We collaborate with your experts to ensure consistent communication and to protect legal privileges when dealing with forensic examinations, etc.

Oppenhoff

Dr. Jürgen Hartung

IT Law and Data Protection ·
Compliance

Jürgen Hartung specialises in advising companies on data protection and IT law, with a focus on outsourcing, IT projects and e-commerce. His experience in data protection covers a wide spectrum, e.g. internal investigations, employee monitoring, international transfers of personal data, social media, data breaches, data protection organisations and data protection audits, etc.
